Bio	I'm a self-taught JavaScript engineer with two years of experience. I learn through building products and solving problems. I can now build high-grade, production-ready React apps. My favorites are <a href="#">Imitategram</a> a replica of Instagram, detailed blog post <a href="#">here</a> . And <a href="#">Mente</a> , a meditation app. I'm also starting to be an OSS contributor to WordPress.
Technical Skills	<p>I'm a generalist. But my main focus is on:</p> <ul style="list-style-type: none"><li>• Single web applications development with React, Redux, and Next.js.</li><li>• JavaScript and TypeScript.</li><li>• Redux Saga (<a href="#">WordPress data stores</a>).</li><li>• Familiar with Vue.js.</li></ul> <p>I'm also flexible to adjust to new technologies and methods of building apps. My goal is to be product-focused, rather than tools-focused.</p>
Experience	<p><b>BaghTel.com - Junior Front-end Engineer - Hotspot Auth</b> <b>2019 - Present</b></p> <p>I develop simple authentication pages for public hotspots in Baghdad, Iraq. They have to be secure, fast, and mobile-ready. And ads have to be offline-first.</p>
Education	<p><b>B.Sc. of Economics - Tishreen University</b> <b>2014 - 2015</b></p> <p>I studied economics in Tishreen university for a year in Latakia, Syria. Had to drop my education to flee the Syrian war.</p>
Languages	<ol style="list-style-type: none"><li>1. Arabic - Native speaker</li><li>2. English - Fluent C1</li><li>3. German - B2</li></ol>
Interests	<ul style="list-style-type: none"><li>- I'm an avid gamer (Love Dota 2).</li><li>- Car enthusiast. I love mechanic engineering in general.</li></ul>
